

## Notice to members

Warmest greeting to all members.

The management is very appreciative of the support and contributions of members towards the wellbeing of our club.

It is the objective of the management to continue providing excellent facilities and services for the enjoyment of our members. Towards this end, management has proposed various improvements and programmes to upgrade all club facilities especially the golf courses and club house amenities. All these however require the expending of funds over the next few months and beyond.

Members are aware that management has refrained from burdening members whereby fees such as subscription, golfing and others have not been increased over the past few years. This course however has become untenable due to the increasing cost of most inputs, machineries and salaries

To mitigate the issues of rising cost of running the club, management has decided to impose a golf levy of RM5.00 and RM10.00 per round of 9 and 18 holes (both for trolley and buggy usage games) effective from **1<sup>st</sup> April 2024** until further notice.

This levy will ease the current financial situation at the club and any long-term measures will only be considered after getting the consent and endorsement by the general body of members.

Management appreciates your understanding and requests for your continuing support in our efforts to provide excellent facilities and services for the benefit of all members in our effort to make our beloved KGS a premier club.

**MANAGEMENT**
